

Nancy and the Squires Group.

Dear Nancy, I greet you with this happiness I am having at my heart. I hope and wish that you are doing well and fine wherever you are. The Lord has kept me safe and sound up to this day that I get the chance to receive your favours.

I have written to inform you about my sincere gratitude and the joy I am having right now because of the laptop that you have sent to me through Judy. I don't have the real words to express my happiness because what you have done for me is so great and massive. I have been having a lot of challenges coming in my education because of lack of a laptop.

My name is Nassiwa Jane Sylvia, a twenty year old christian Ugandan. I study from Makerere University in Kampala Uganda and I am doing Bachelor of Medicine and Bachelor of Surgery. The course has been very hard for me without a laptop and this affected some of my results last semester. We used to have research work, writing reports and making presentations in some of our lectures. Due to lack of a laptop, I sometimes could not do my part and I ended up losing marks for these periods. I only had my phone which was of little help for the above and my fellow students could not sometimes help me with theirs as they were using them.

I am not part of your group but I have received such a great gift from you even without knowing me. This is so great on my side. I promise that I am going to use it so purposely for my excellence, improving my performance and focusing on my goal of becoming a great doctor.

I studied my primary level from Lyna infants primary school in Lukaya, I worked very hard and I emerged as the best in the school. This helped me get admission in a nice school in Masaka. I continued working hard and I completed my ordinary level studies at St. Jude Secondary School Masaka where I performed so well and was the best girl in Masaka district. This helped me because the same school gave me a bursary for my Advanced level studies which helped me concentrate on my studies without having any fears of fees.

I completed my Secondary level studies in 2017 and I passed highly that I was admitted to Makerere University with the course of My dream Medicine and Surgery.

I am still in my first year, and have been working so hard only that I had the problem of a laptop. I am from Masaka district, Kayunga villages. I have an elder brother and other four brothers but none after me.

Our father has been paying our school fees though he earns little. The scholarship helped my father to be in position to support other siblings and this has been keeping my hardwork high.

I want to become a surgeon or a researcher in the medical field if God permits. I usually pray for it and now that I have received what I have been longing for, I must reach my dream and the sky will be the limit.

I have just met your sister today who has brought the laptop to me. I have liked her. She is so jolly, friendly and welcoming even to strangers. I have met her through my father with whom they are friends. I am hoping to see you one day and experience your kind and giving heart in person and also to thank you in person for what you have done for me.

I am just praying for all of you to the almighty God to shower with his blessings, to keep you happy.

Give you whatever you want, keep you alive with your generous and kind heart.

May God bless you

Yours faithfully

NASSIWA JANE SYLVIA
